SKILLS

Programming JavaScript (ES6+) | TypeScript | HTML5 & CSS3 | React.js | Next.js | Python | Django | SQL
Technologies AWS ECS/RDS/S3 | Git/GitHub | Docker | PostgreSQL | Redis | Pandas & NumPy
Languages English | Afrikaans | Japanese | German | Turkish

EDUCATION

Birkbeck, University of London **2019 - 2022**
BA (Hons) Linguistics and Japanese *London, UK*
UCL (University College London) **2026 - 2028**
MSc Digital Humanities *London, UK*
City Lit **Oct 2022 - Current**
Student *London, UK*

- Introduction to Python | Intermediate Python | Advanced Python (3 months)
- Middle Egyptian Hieroglyphs (2 years+) | Attic Greek (6 months) | Old Persian Cuneiform (2 months)

EXPERIENCE

Drumroll **Nov 2025 - Current**
Co-Founder & Sole Developer *London, UK*

- Architected a multi-tenant SaaS application enabling hospitality businesses to manage rotas, employee scheduling, clock-in/out time tracking, holiday management, shift swaps, and payroll — serving admin, manager, and employee roles.
- Developed a Python/Django REST backend featuring JWT authentication and role-based access control.
- Built a responsive Next.js frontend with internationalization (i18n).
- Crafted efficient database queries and sorting algorithms to deliver a fast API.
- Engineered a CI/CD pipeline for AWS deployment using Docker containers, including unit testing.
- Implemented load balancing to ensure fault-tolerance and reliability of the application.
- Used by hospitality businesses in London, with over £1m+ turnover. Currently in talks with more hospitality businesses in London to expand.

Bread By Bike **Mar 2022 - Current**
Internal Developer & Supervisor *London, UK*

- Developed a production sales dashboard using Square and Shopify APIs to automate sales reporting. [Demo](#)
- Created a web tool for getting customers accurate safety information around allergens for a frequently changing menu.
- Spearheaded initiative for reduced manual data entry for owners by writing a python application that provides fast querying and data visualisation.
- These projects accumulated such positive impact, the business eagerly signed on as the first paying customer of Drumroll.
- Oversaw day-to-day operations at the company, including employee scheduling and training, managing stock, and B2B relations.

NOTABLE PROJECTS

Vox Mundi **[Link](#) | [GitHub Repo](#)**
Full Stack Developer *London, UK*

- Deployed a three-tier architecture on Vercel, Railway, and Neon with full CI/CD pipeline.
- Designed the database models for efficient queries and scale while maintaining data integrity.
- Researched different calendars (Gregorian, Islamic, Ancient Egyptian) and wrote an algorithm that seamlessly converts events from one to the other.
- Key Technologies: Next.js, React.js, Django, PostgreSQL, JWT Authentication.

Orpheus Archives **[Link](#) | [GitHub Repo](#)**
Full Stack Developer *London, UK*

- Developed a full-stack catalogue app for films, books, and music with Next.js, Django REST, and PostgreSQL.
- Implemented custom search, sorting, and analytics endpoints.
- Integrated with external APIs (TMDB and OpenLibrary) to import large amounts of data into the database efficiently.
